Applications

GRIPIT

DUAL ACTION
ORBITAL
SANDER

BACKING UP
PAD

Applications

- For cleaning, finishing and conditioning flat or irregular metal surfaces with portable and stationary sanders.
- For refining edges in the glass industry, and plastics in the automotive industry.
- Provides excellent results in stainless steel and carbon, aluminum, bronze and other nonferrous metals.

Characteristics

- Its open structure dissipates heat, preventing burns in the pieces.
- Designed to meet the highest levels of hardness and resistance while reducing the chances of damage to surfaces.
- Feature uniform sanding patterns, resulting in high-quality finishes.
